

MOBILE STRIPPING MACHINE

APPLICATIONS

- ➔ Substrate surface : steel, titanium, aluminium, composite, glass, ...
- ➔ Media type : Fruit hulls, corn and wheat starch, plastics medias
- ➔ Type of work :
 - Cleaning the surface (remove grease and dust but no liquid)
 - Remove the paint
 - Remove the mastico Prepare the surface before painting or sticking
 - Remove fouling on the surface

MOBILSTRIP28

The Mobistrip 28 machine vacuum blast machine in an environmentally friendly dust free stripping solution which is easy to use and versatile

The use of recyclable media provides cost effective and efficient stripping (or blasting) as well as close control of the surface preparation.

As the process is safe and dust free other production processes can be carried out close the stripping (or blasting) operation.

Available in fully pneumatic and electro-pneumatic version.

In option, a special head for stripping work and to see the progress

FEATURES

- ➔ Stand alone unit includes automatic dust extraction and media recycling system
- ➔ Fully pneumatic
- ➔ Allows stripping from low to high pressure (1-7 bar)
- ➔ Maximum hose length of 5 meters
- ➔ Can be incorporated into an automatic on-line stripping (or blasting) process
- ➔ Easy injection media principle

BENEFITS

- ➔ Totally dust free environmentally friendly stripping
- ➔ Other job site operations can be conducted close to the stripping area
- ➔ Zero dust contamination on the job site
- ➔ Many common shapes can be stripped with ease
- ➔ Low operation cost due to the use of recyclable media
- ➔ Flexible and versatile

| Technical specifications MOBISTRIP 28 : | Pneumatic |
|-----------------------------------------|------------------|
| Media capacity (ltr) | 28 |
| Max. hose length (meter) | 5 |
| Empty weight (kgs) | 68 |
| Dimensions (W x L x H mm) | 530 x 610 x 1400 |
| Max. working pressure (bar) | 3 - 7 |
| Recommended compressor size (l/min) | 3500 |
| Average width blast pattern (mm) | 28 / 32 |
| Max. media size (mm) | 1,8 |
